

## Presenting the Linked Data Inbound/Outbound approach and the Liferay Linked Data Module to the Greek Open Source community

National Technical University of Athens, Athens

14-15/05/2010

In order to support and disseminate our work to the Open Source community, we will participate in the [5<sup>th</sup> annual conference of the Greek Open Source community](#) to be held in Athens on the 14<sup>th</sup> and 15<sup>th</sup> of May 2010.

In the [presentation](#) we shall introduce Semantic Web and Linked Data concepts and try to show how they can be relevant for Web development and data integration, making the connection with our own Inbound/Outbound approach for Linked Data and the open source software we have developed according to this principle.

You are cordially invited to attend the presentation (Saturday, May 15, 12.00-14.00), meet and greet, as well as discuss technical approaches and opportunities for collaboration.
